

Wed 28/09/2011

Dear,

I am an acupuncture practitioner, there are some questions which I don't know exactly, if possible, please have a look and response me.

**English language skills:**

3.5 whether you agree with exemptions which apply to "grandparented" practitioners?

I agree with the exemptions which apply to "grandparented" practitioners. however, I don't know how to assess my skills \_"appropriate arrangement" ( for the purpose of consultation/treatment and for the contacting emergency services)? Is it to have a self assessment or have a test?

**7.2 Whether you agree with the types of competence evidence requested?**

**Schedule 2-competence evidence:**

**Patient records: -20 de-identified patient records for each division being original patient record.**

Question 1, for a patient record, do I need to copy all the treatments record because some patients have three or four months treatments - lots of pages record.

Question 2, 20 de-identified patient records. Is this too much work for us to preparation? 20 Patient records is not a problem for us. What am I worrying is Justice Peace' signature such as I apply two divisions - that is 40 records, if every record has two pages, all together will have 80 pages. To check, sign and stamp those documents is a hard work for JP. I don't think JP is willing to take this work .because most of JP do this job for free , if we pay money for this work ,that will increase our financial burden. I think 10 patient records is enough to show our skills and competence.
